Technical cabinets

For ONE EVO^{bollards}

CAME 
URBACO

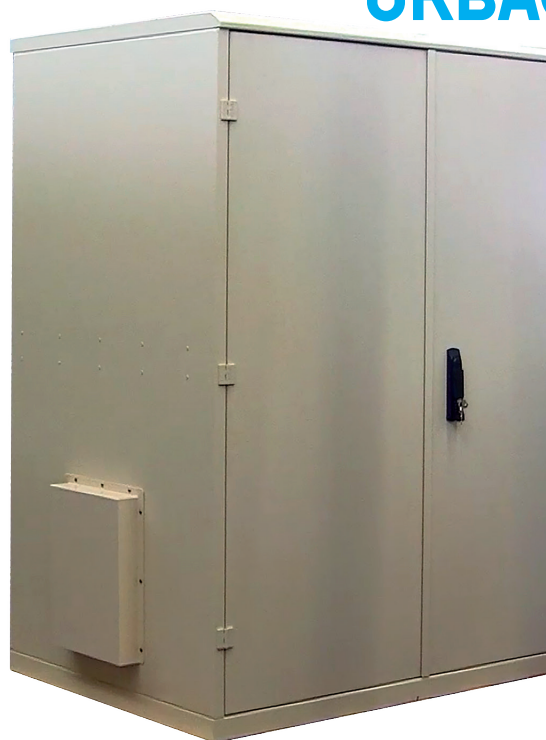

DESCRIPTION

Urbaco technical cabinets are for installing in the street.

Due to their large internal volume, they can house an automation plate (protection, terminals and controls) and one or more hydraulic units...

For easier tube installation, these technical cabinets are designed bottomless.

A concrete base must be built under the cabinet to create the space needed for electrical and hydraulic leads to pass through, and to raise the cabinet up from the finished ground.

CHARACTERISTICS

Material: 2-mm thick aluminum

cabinet color: RAL 1015

Top coating: structured polyester powder

Fastening: to the ground with four anchoring points

Protection rating (EN 60529): IP54 IK10
